PROFESSIONAL SUMMARY

Cybersecurity undergraduate with a strong interest in Security Operations Center (SOC) operations, security monitoring, threat detection, and incident response. Gained practical exposure through an internship, a cybersecurity analyst job simulation, and security-focused projects. Familiar with networking fundamentals, SOC concepts, Windows OS fundamentals, and tools such as Wireshark, Nmap, and Kali Linux. Experienced in building secure web applications with authentication and security controls. Seeking an entry-level SOC Analyst role to apply technical knowledge and build hands-on investigation skills.

TECHNICAL SKILLS

SOC & Cybersecurity: SOC Fundamentals, Security Monitoring Concepts, Alert Analysis Fundamentals, Incident Response Fundamentals
Networking: TCP/IP, DNS, HTTP/HTTPS, IP Addressing, Network Ports
Identity & Access Management: IAM Fundamentals, Access Management Concepts, IAM Strategy Assessment
Programming: Python
Tools: Wireshark, Nmap, Kali Linux, GitHub
Operating Systems: Windows OS Fundamentals, Linux Fundamentals

INTERNSHIP EXPERIENCE

Cyber Security Intern — Codec Technologies Pvt. Ltd. July 2026 – August 2026

- Gained practical exposure to cybersecurity concepts, security tools, and security-related projects.
- Developed foundational knowledge of cybersecurity practices through hands-on internship activities.
- Strengthened technical understanding of cybersecurity and application security.

Cybersecurity Analyst Job Simulation — Tata Consultancy Services (TCS) June 2026

- Completed practical tasks related to Identity and Access Management (IAM).
- Explored IAM fundamentals, strategy assessment, custom IAM solutions, and platform integration.
- Developed an understanding of access management concepts and their importance in organizational security.

PROJECTS

SecureWatch — Secure Login and Authentication System June 2026

Python, Flask, SQLite, Flask-SQLAlchemy, Flask-Login, Flask-WTF

- Developed a secure authentication app with registration, login/logout, session management, and email-based Two-Factor Authentication (2FA).
- Implemented bcrypt password hashing, CSRF protection, and SQL injection prevention measures.
- Added OTP expiration, rate limiting, and account lockout mechanisms to strengthen authentication security.
- Applied security headers and session security measures to protect against common web threats.

Web Vulnerability Scanner April 2026

Python, Flask, React.js, Vite, Tailwind CSS, SQLite

- Built a full-stack web security scanner to identify common vulnerabilities and security weaknesses.
- Implemented scanning for SQL injection, Cross-Site Scripting (XSS), open ports, hidden directories, and missing security headers.
- Created a security dashboard with scan history, risk-level analysis, charts, and vulnerability summaries.
- Generated automated PDF and HTML security reports with vulnerability details and suggested mitigations.

EDUCATION

Bachelor of Engineering (B.E.) — Computer Science and Engineering (Cyber Security)
Erode Sengunthar Engineering College
CGPA: 8.02 / 10 (up to Semester IV)

CERTIFICATIONS & TRAINING

- Networking Basics — Cisco Networking Academy
- Introduction to Cybersecurity — Cisco Networking Academy
- Cybersecurity Analyst Job Simulation — Tata Consultancy Services (TCS)
- Cybersecurity Internship Certificate — Codec Technologies Pvt. Ltd.

ACHIEVEMENTS

- **First Prize — Brute Force Quiz:** Sengunthar Engineering College.
- **Second Prize — Paper Presentation:** Sengunthar Engineering College.

LANGUAGES

- Tamil — Native
- English — Professional Working Proficiency
